PROFESSIONAL EXPEREINCE

Ministry of Economic Affairs - Digital Transformation Unit

Junior Software Developer   **August 2023 - Present**

- Spearheaded digital automation initiatives, transforming manual government processes to enhance efficiency within Tourism and Immigration
- Initiated and led a pivotal project to digitize public records, improving accessibility and security while reducing paper use by 60%.
- Developed and maintained six conference websites from concept to launch, ensuring seamless user experience, mobile responsiveness, and on-time delivery for each event.
- Collaborated closely with event coordinators and stakeholders to implement real-time updates, registration modules, and session schedules, driving attendee engagement.
- Assisted non-technical user's with onsite registration for a major conference, enabling smooth check-in experiences and real-time badge printing, improving attendee satisfaction.
- Provided ongoing maintenance and support for active projects, including bug fixing, feature enhancements, and performance optimizations to ensure consistent quality.
- Worked cross-functionally with designers, analysts, and stakeholders to deliver incremental improvements in response to evolving user needs.

Plato Alpha Designs

Junior Software Developer   **August 2022 -July 2023**

- Developed new features within Tri-BlockHR using Laravel and React frameworks, improving client solutions and user experience
- Managed the Back-end and Front-end of REV's website, updating and implementing various request
- Provided IT support to REV's customer service team, handling disruptions within their network regarding their billing system
- Spearheaded an integration project to automate the uploading of airport flight schedules and shipping times, utilising PHP code on a Linux server to generate images. These were then synchronised to a Dropbox folder for display on REV TV's Weather and Advertising Channel
- Implemented automation to automatically update applications stored on AWS to reduce manual errors

Bahamas First General Insurance

Software Developer   **May 2021- July 2022**

- Automated product build processes and enhanced user interface design, significantly improving product development efficiency
- Collaborated in high-paced environments to develop high-quality digital products, leveraging industry best practices
